

Shadow Resume Project – Phase 5: Resume File Upload & Media Handling

1. Updated Resume Model (resumes/models.py):

- Added: `resume_file = models.FileField(upload_to='resumes/files/', blank=True, null=True)`

2. Ran Migrations:

- `python manage.py makemigrations`
- `python manage.py migrate`

3. Configured Media Settings (settings.py):

- `MEDIA_URL = '/media/'`
- `MEDIA_ROOT = os.path.join(BASE_DIR, 'media')`

4. Updated Project URLs (shadow_resume/urls.py):

- Added `static()` for `MEDIA_URL` and `MEDIA_ROOT`

5. Updated ResumeForm (resumes/forms.py):

- Included `'resume_file'` in fields

6. Updated Create View (resumes/views.py):

- Handled `request.FILES` in form
- Saved uploaded file to model

7. Updated Template (create_resume.html):

- Added `enctype='multipart/form-data'`
- Included `{{ form.as_p }}` to show file field

8. Displayed Uploaded File (dashboard.html):

- `<a href='{{ resume.resume_file.url }}'>Download Resume</a>`

Optional:

- settings.py: `DATA_UPLOAD_MAX_MEMORY_SIZE = 10485760 (10MB)`

■ Phase 5 Complete: Users can now upload and access resume PDFs.

Next: Phase 6 – Frontend Design with Tailwind or Bootstrap
